Also, want to give you a heads up: we had a call w/ Oxitec this morning about what we need them to do w/ respect to their EA/ESA analysis. They plan to resubmit as soon as they can. Are you taking leave any time soon because we will be sending it to you for review as soon as we have it in near final shape?

Thanks! It makes me think again that at some point we need to have discussion with all 3 agencies together regarding GE insects. Seems lately most of the discussion has been only EPA and FDA, but am wondering down the road if new products will make jurisdiction less clear. Particularly with APHIS-Vet Services and the Livestock Health Protection Act. Whad'ya think? (Don't answer, Oh Great, another meeting☺)

Chris
